CLINIQUE DE GENOLIER

Established in 1972, Clinique de Genolier is one of Switzerland's largest private hospitals, offering a bed capacity of 98 and a medical team of 230 accredited physicians. This flagship Swiss Medical Network hospital is strategically located between Geneva and Lausanne and provides specialised healthcare management, ultra-modern medical technology and the services and luxury of a first-class hotel, under one roof.

The hospital is renowned for its pioneering work in cancer treatment and a radiation oncology centre, positioned among the most avant-garde in Europe. The implementation of Intra-Operative Radiotherapy (IORT) for breast cancer further highlights its innovative medical approach. Clinique de Genolier also excels in general and visceral surgery, neurosurgery, orthopaedics and plastic surgery, supported by advanced medical imaging. Other wide-ranging services are available in the fields of gynaecology, neurology and cardiology. Hospital facilities include an outpatient centre for specialised consultations, diverse healthcare services and an onsite laboratory for analyses. Clinique de Genolier assures accurate diagnoses and a premier healthcare experience, in the heart of Switzerland.

CLINIQUE DE MONTCHOISI

Founded in 1932, Clinique de Montchoisi is one of the most renowned establishments in the Lake Geneva region. Nestled in a quiet and lush green location in the heart of Lausanne, the hospital is committed to providing healthcare excellence through unique treatment programmes, developed for each patient.

In addition to its privileged setting, Clinique de Montchoisi is highly acknowledged for its outstanding medical services and the medical know-how of nationally and internationally renowned specialists. The hospital's flagship specialties include ophthalmology, orthopaedics and otolaryngology (ENT).

Hospital facilities include six operating theatres equipped with state-of-the-art technology, a radiology institute with the latest generation MRI device, a physiotherapy and occupational therapy centre and two medical centres dedicated to outpatient consultations.

CLINIQUE VALMONT

Founded in 1905 and located on the heights of Montreux, Clinique Valmont benefits from national and international recognition as a neurological and orthopaedic rehabilitation centre and is expressly renowned for its unrivalled therapeutic efficiency. Furthermore, thanks to a peaceful environment with panoramic views of the lake and the Alps, it is the ideal rehabilitation destination.

A team of highly experienced internists, neuropsychologists, physiotherapists, occupational and speech therapists, sports coaches and dieticians work very close together with the hospital's head-physicians.

The ultramodern technical facilities include a fitness room with innovative equipment enhancing physical and cognitive recovery, a therapeutic pool and a wellness space with sauna, hammam and tropical showers. The occupational therapy centre features facilities such as a kitchen and an outdoor garden space to replicate everyday life situations, to assist with patient therapies.

CLINICA SANT'ANNA

Located in Lugano, Clinica Sant'Anna is the leading maternity hospital in the Ticino region and one of the largest private maternity hospitals in Switzerland. The hospital is equipped with an ultramodern neonatal unit that currently performs approximately 800 births per year and a state-of-the-art neonatal critical care unit for premature babies.

After recent renovation of the delivery rooms, Clinica Sant'Anna is proud to underline their comfort and safety, with a key focus on sustainability, durability and the enhancement of the natural dimension of childbirth. The hospital is also at the forefront of reproductive healthcare and offers advanced services, such as In Vitro Fertilization (IVF).

Clinica Sant'Anna has five high-tech operating theatres and is also highly specialised in the field of women's health, senology, oncology, internal medicine and plastic surgery.
